

Manage the ICD-10 transition with confidence with QuadraMed's ICD-10 Countdown Program

ICD-10 Countdown Program

The upcoming ICD-10 transition will affect every system your organization utilizes today. Our comprehensive suite of solutions will help you decrease productivity losses and successfully plan for the transition by:

- Assessing your ICD-10 readiness and helping you create an action plan;
- Helping you determine and reduce your financial risks;
- Ensuring your IT systems are ICD-10 ready, and;
- Educating your coders with the knowledge they need to be successful during the transition ICD-10.

Quantim ICD-10 Coding Simulator

ICD-10 COUNTDOWN PROGRAM

Our comprehensive ICD-10 Countdown Program includes the following services, which can be mixed and matched with additional countdown program components to create a tailored ICD-10 program just for you.

- ICD-10 Readiness Assessment
- ICD-10 Data Analytics
- ICD-10 Impact Assessment
- ICD-10/Elsevier e-Learning and Education Program
- ICD-10 Coding Simulator with online, avatar-lead application tutorial, "Countdown to ICD-10"

ICD-10 Readiness Assessment

Let us help you develop a strategic ICD-10 Road Map with our Readiness Assessment. This service is ideal for small or community hospitals (under 250 beds) that have not yet begun the transition process to ICD-10. We'll provide you with a step-by-step guide so that you can identify your timeline around the ICD-10 transition. After answering an ICD-10 questionnaire designed by ICD-10 experts, we'll tell you what your first steps should be. And that's often the hardest part. In addition to the online questionnaire, the ICD-10 Readiness Assessment also includes:

- ICD-10 education webinars for key stakeholders
- The development of a steering committee around the ICD-10 transition
- MS-DRG data analytics overview (a subset of our more comprehensive ICD-10 Data Analytics service)
- Action Plan
- Analysis Report
- Our innovative, online ICD-10 Coding Simulator can be bundled with the Readiness Assessment to meet your specific transition needs.

Benefits

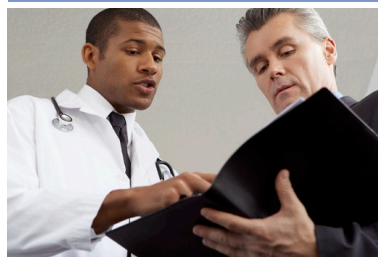

- Decrease disruptions to day-to-day activities by proactively preparing for the transition
- Effectively budget for the transition with step-by-step action items
- Improve preparation efforts and ensure peace of mind

ICD-10 Data Analytics

Are you aware of your ICD-10 transition risk areas that may lead to significant productivity loss? Identify and reduce financial, clinical, and documentation risks related to the ICD-10 transition with QuadraMed's ICD-10 Data Analytics Service.

We'll analyze your health system's reported claims and identify specific Major Diagnostic Categories (MDC)/Medicare Severity Diagnosis-Related Groups

continued ▶

(MS-DRGs) that present the greatest potential for revenue loss under ICD-10. We'll also determine your most often reported diagnoses—grouped by MDC—and then determine your minimum, maximum, and likely payments under ICD-10 codes. In addition, the claims data is used to determine risks for productivity loss, areas for improvement in clinical documentation, and to help you gain the upper hand in renegotiating managed care contracts that are based on MS-DRGs.

Benefits:

- Improves documentation
- Reduces productivity loss
- Improves contract negotiations
- Mitigates the effects of ICD-10

ICD-10 Impact Assessment Service

Are you fully prepared for the transition to ICD-10? Many IT systems will be impacted by the new code set changes, so if you're not ready, you're not alone. We'll help you get there with our ICD-10 Impact Assessment Service. We've partnered with Top Tier Consulting, an industry leader in system-wide ICD-10 analyses, to work with you to evaluate and address areas of potential impact including IT systems and software, trading partner-readiness, payer contracts, budgets, and more.

In our phased approach, we will review our findings with you, create a comprehensive testing approach and strategy for a successful implementation, and then help you transition to ICD-10.

Benefits:

- Reduce claim denials
- Reduce productivity losses
- Address issues with trading partners unprepared for ICD-10
- Ensure systems are ready
- Prepare for regulatory change
- Prepare budgetary information

ICD-10 e-Learning and Education Program

With the number of new codes to learn, your coders need education tools that are simple and comprehensive. Created by healthcare professionals, the ICD-10 Education Program features innovative e-learning courses built on

Elsevier's intuitive and easy-to-use platform that provides single-transcript tracking, allowing your administrators to view individual learning activity at the click of a button. In this comprehensive, powerful learning solution, coders can practice their newly learned knowledge on our ICD-10 Coding Simulator, an online solution that's part of the ICD-10 Countdown Program.

Interactive lessons in anatomy and physiology, pathophysiology, medical terminology, and coding guidelines available 24/7 and self-testing encourage learner engagement while delivering standardized training to one or multiple departments throughout your facilities.

Benefits:

- Improves educational planning
- Enhances self-assessment capabilities
- Enhances educational reporting
- Improves current coding performance

ICD-10 Coding Simulator

Get a guided tour of coding in ICD-10 with our online ICD-10 Coding Simulator. With this powerful learning tool, coders can pace themselves as they follow an animated avatar instructor through the process of coding in ICD-10. You'll have access to the Countdown to ICD-10 tutorial, which uses Quantim® for coding. The avatar instructor will present a case and a discharge summary and then walk coders step-by-step through the different resources needed in Quantim, such as the ICD-10 CM and PCS books, in order to build the correct code.

Plus, after viewing a discharge summary, coders will be presented with a short quiz with multiple answers designed to test the coder's medical terminology.

Benefits:

- Educates coders on medical terminology for ICD-10
- Reduces potential for productivity loss with guided education before the ICD-10 transition
- Enables self-paced learning so coders can practice coding in ICD-10 when they have time
